

Dear "Isaiah Thomas,"

3/9/17

My feedback on your presentation includes, my favorite part, what I learned, and what I thought you did well. My favorite part was when you got in trouble with the local authorities in Nova Scotia, and mimicked the British man. It was funny when the British man coughed, and how you hunched your back as his character. Switching the characters was also something I thought you did well. There were two other things I thought you did well. The first is that you passed around objects that were used in that time period. This gave us a better understanding of what was happening, and made it easier to remember/learn. The last thing you did very well is that you stayed in character. This was very good since it showed us how a printer would act back then. There were also a couple of things that I learned from your presentation which I didn't know from the packet we read beforehand. The first thing was the placement of his siblings, and his friends. The second was upgrades of his printers and the amount.

Thank you for coming and reading.

Jeffrey Ruderman

3/9/17

Dear "Isaiah Thomas", what I liked about the presentation is that the actor stayed in character. He made it seem that we were in 1812. He shared basically your whole life to us and what I thought was surprising is that you started your job at 7 years old! He read in class a packet that told a lot of information about you and it was very interesting. He told us about Ammonia and that's just disgusting. And he told us about your family to.

Dearⁿ Sarah Thomasⁿ

3-9-17

I learned a lot from you coming to our school like how a printer works. You played basketball so well and you stayed in character thinking that it was 1812. I thought this was a better way of learning about Jim Mathers than reading some paragraphs in class. It was very interesting and I learned a lot from it and a lot about his life.

Dear "Isaiah Thomas,"

3-9-17

You did a good job staying in character! The whole time you were on track and sounded like you were from 1812! Our class read a packet ~~about~~ about him and learned interesting facts. I never knew that urine is ~~so~~ used to clean the printer. I must have been hard working at 7 not knowing how to read or write. Especillay if you were a printer! It must have been really hard if you were lifting over 100 pounds. You were a very good actor, thank you for coming!
