

Displaying Images in Omeka

These slides were originally created by
Molly O'Hagan Hardy for a presentation
at AAS in December 2015.

Images in Omeka

These slides cover:

1. Images associated with Items
2. Images not associated with Items*
3. Inspecting how images look on your site in other devices

*assumes you have basic access to your server

1. Images Associated w Items

- Determining size and location of Item File Images
 - Appearances to
 - Configure theme to
 - Check “Item File Gallery” if you want thumbnails to appear to the left of your metadata. [Brenna has done it this way.](#)
 - Uncheck “Item File Gallery” if you want full images to appear above your metadata. [Kayla is doing it this way.](#)
- Determine order of images
 - Under item “file,” once you have more than one, you can adjust order
- Problems w image display? Be sure that the HTML in security settings have been turned off

2. Adding Images to

Exhibit Description Pages (1)

- Upload the image to the server

– Download Filezilla

- Our webhost is `XX.XX.XX.XX`

- Enter your username and your password

- Add your images

- Get the URL for your image location

2. Adding Images to Exhibit Description Pages (2)

- View Page Source info (recall Brenna's slides on how this looks different depending on which browser you are in)
- Insert image source code ``

3. Trying your new image on for size...

- From your browser, right click to get a drop down
- Select “inspect elements”
- Hit the smart phone icon and start playing!
